

AI CAREER SEARCH & APPLICATION AGENT

# CAREERPILOT AI

*From Resume to Right Opportunity.*

---

HACK THE STACK 2026 • FINAL ROUND • PROBLEM 01

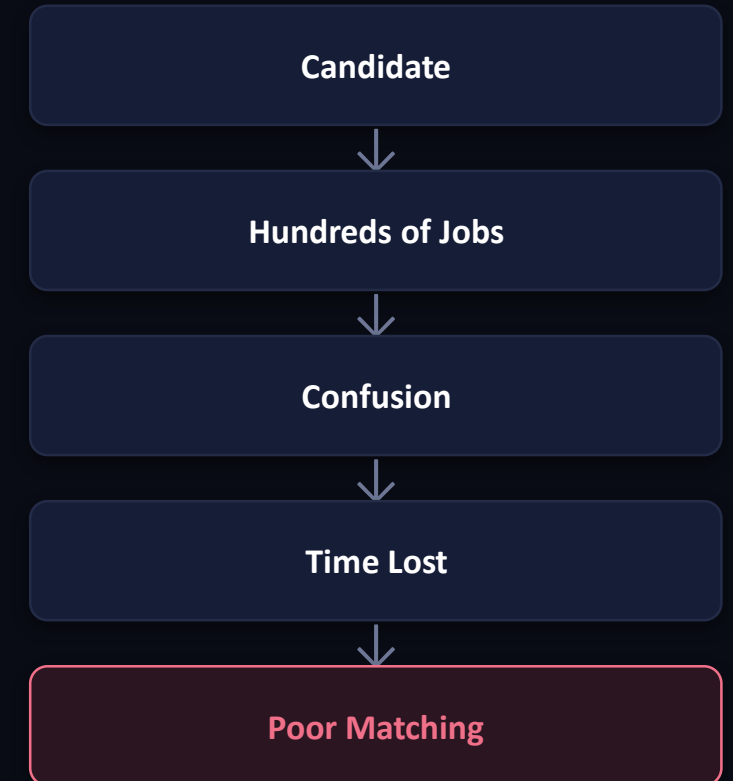

## THE PROBLEM

# Finding a job is easy. Finding the RIGHT job is not.

- Search through countless openings
- Interpret confusing job requirements
- Understand whether they actually fit
- Modify resumes for every role
- Identify missing skills
- Track scattered applications

Traditional filters answer: **“What contains these keywords?”**

Candidates need: **“Why is this job right for ME?”**

## WHY EXISTING SOLUTIONS FAIL

**CareerPilot doesn't just search jobs.  
It understands the candidate.**

### TRADITIONAL JOB PORTAL

### CAREERPILOT AI

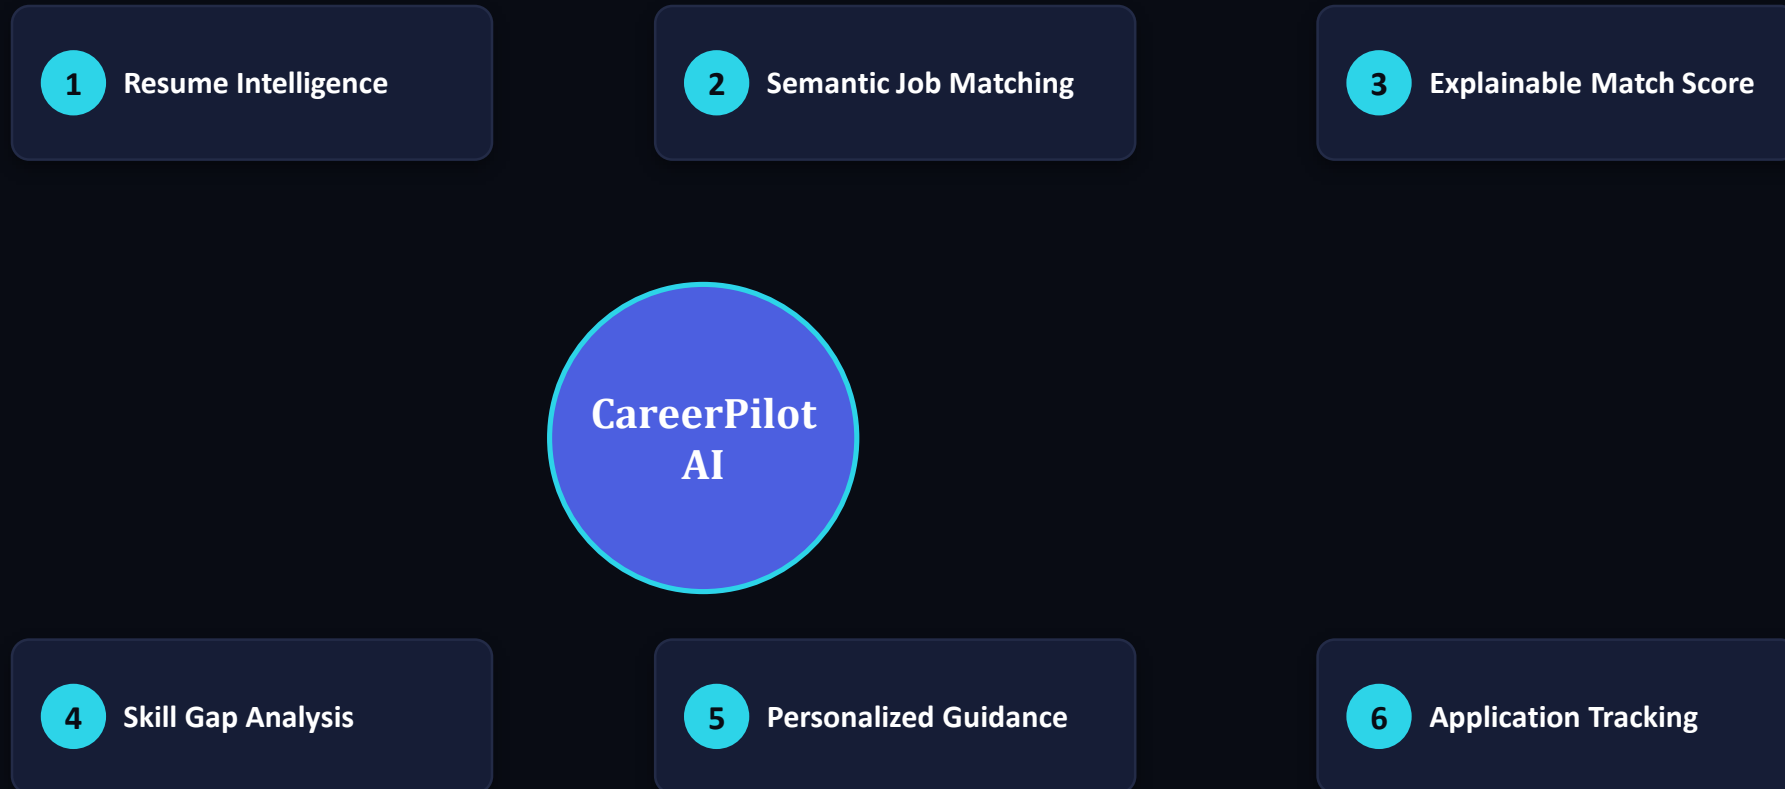

## OUR SOLUTION

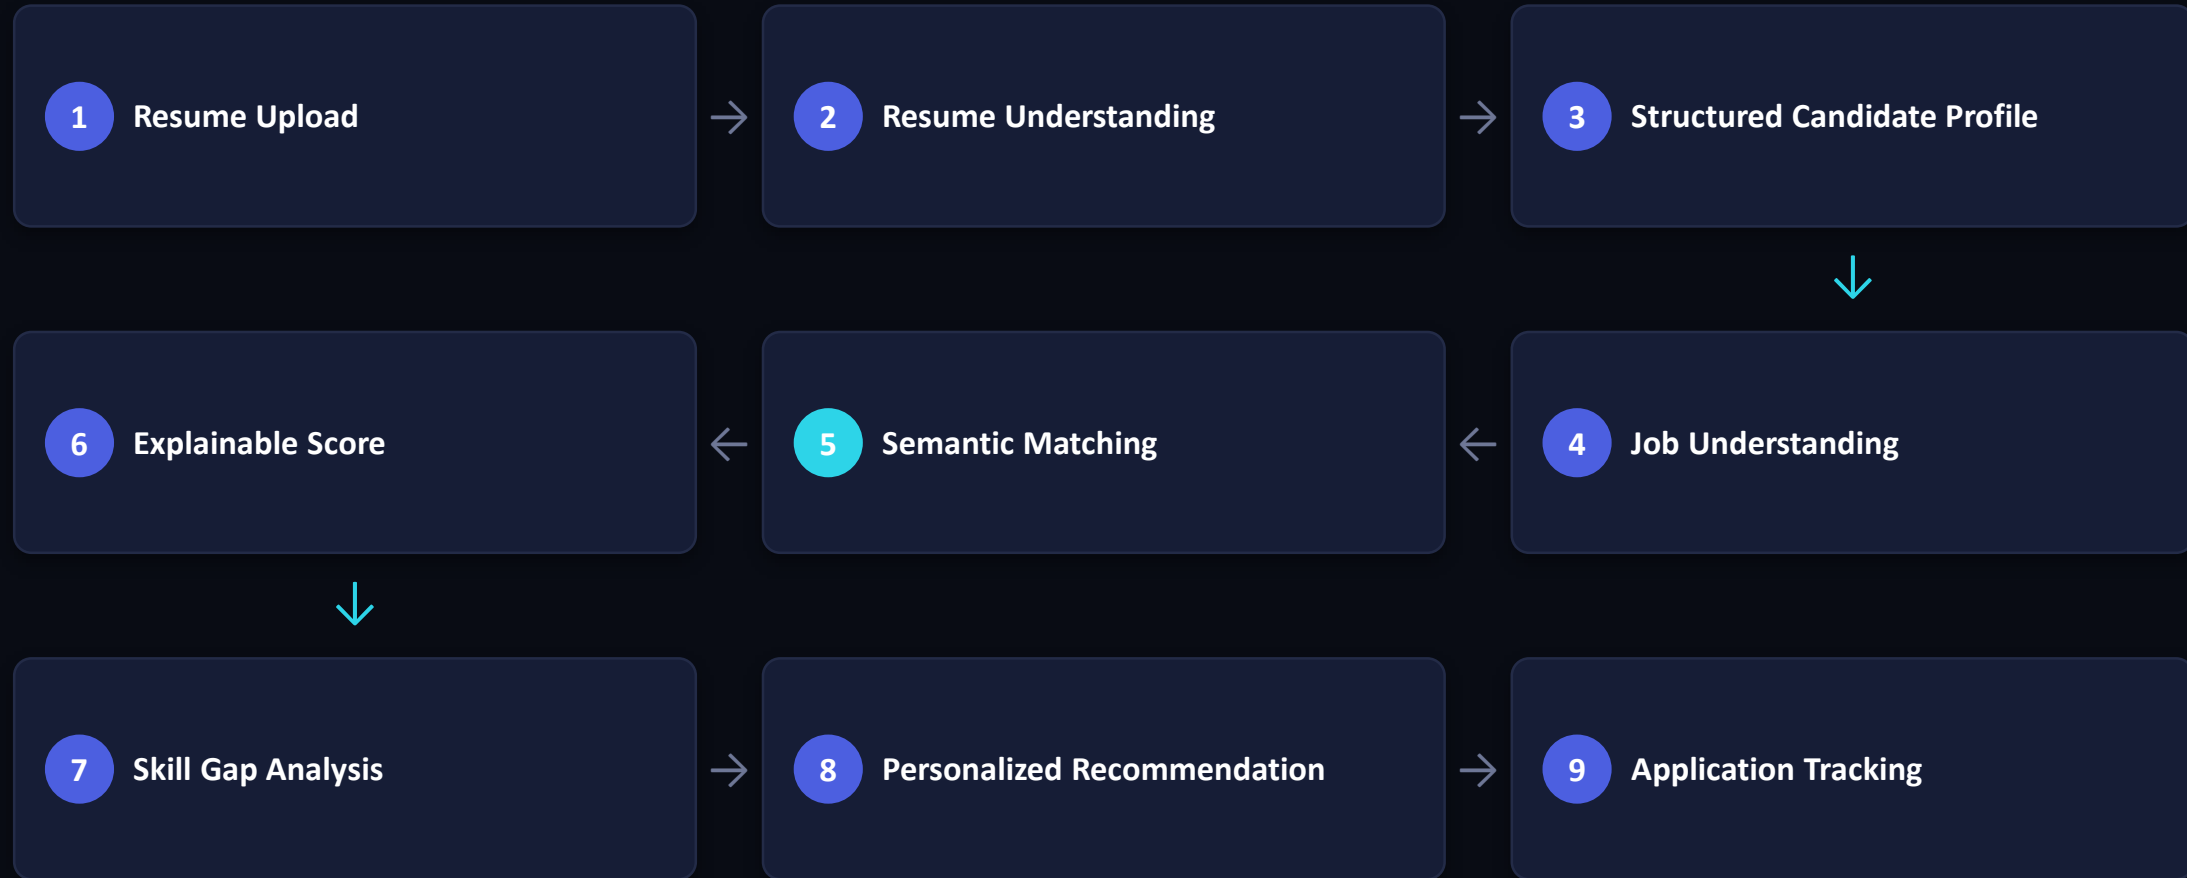

# Meet CareerPilot AI

An AI-powered career assistant that understands a resume, finds suitable opportunities, explains the match, identifies skill gaps, and manages the application journey.

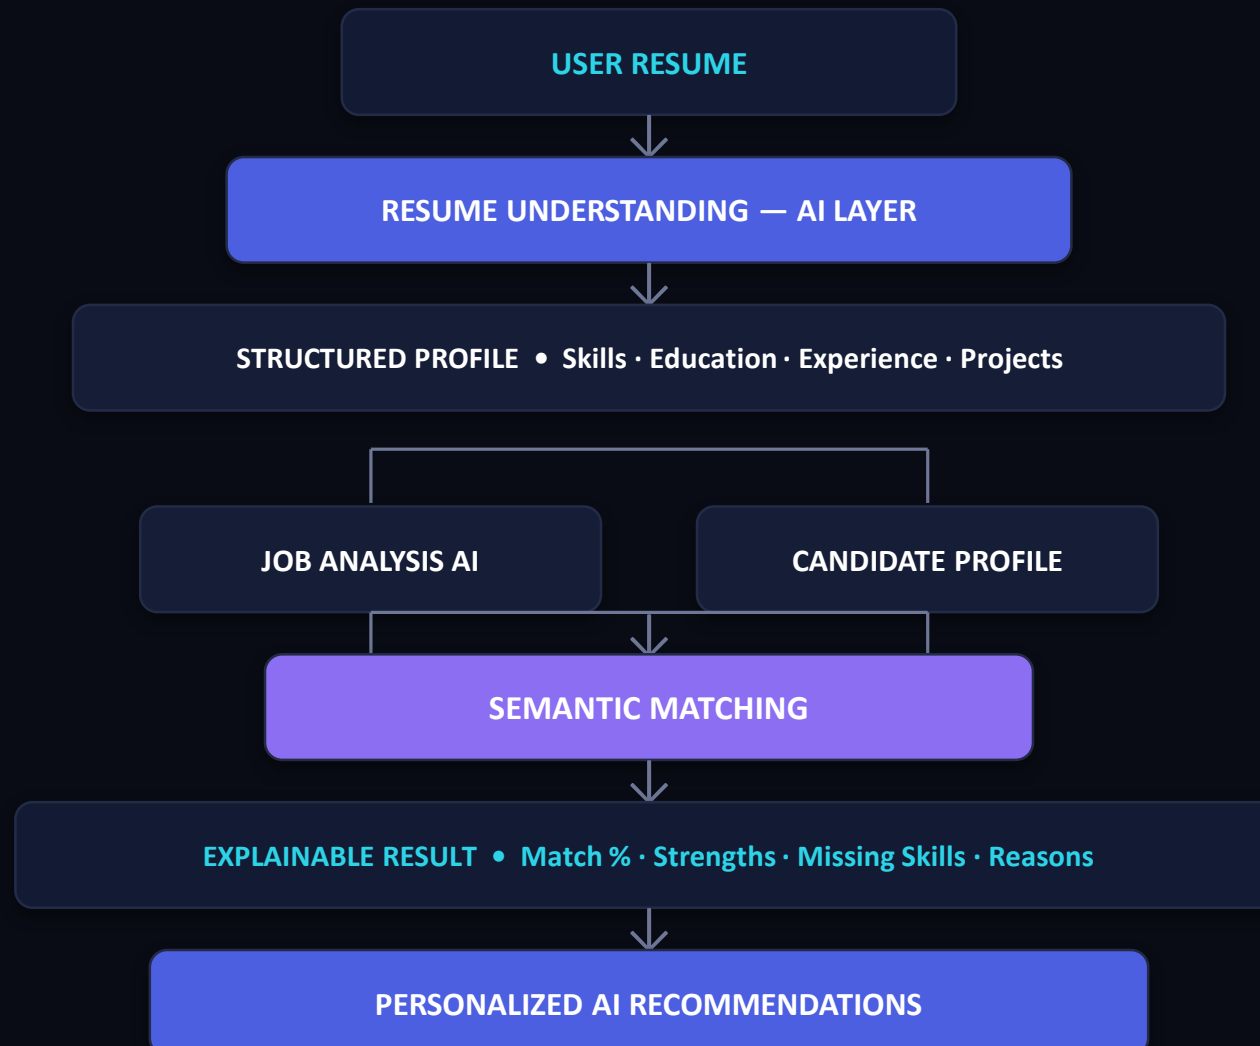

*6 capabilities. One connected intelligence layer.*

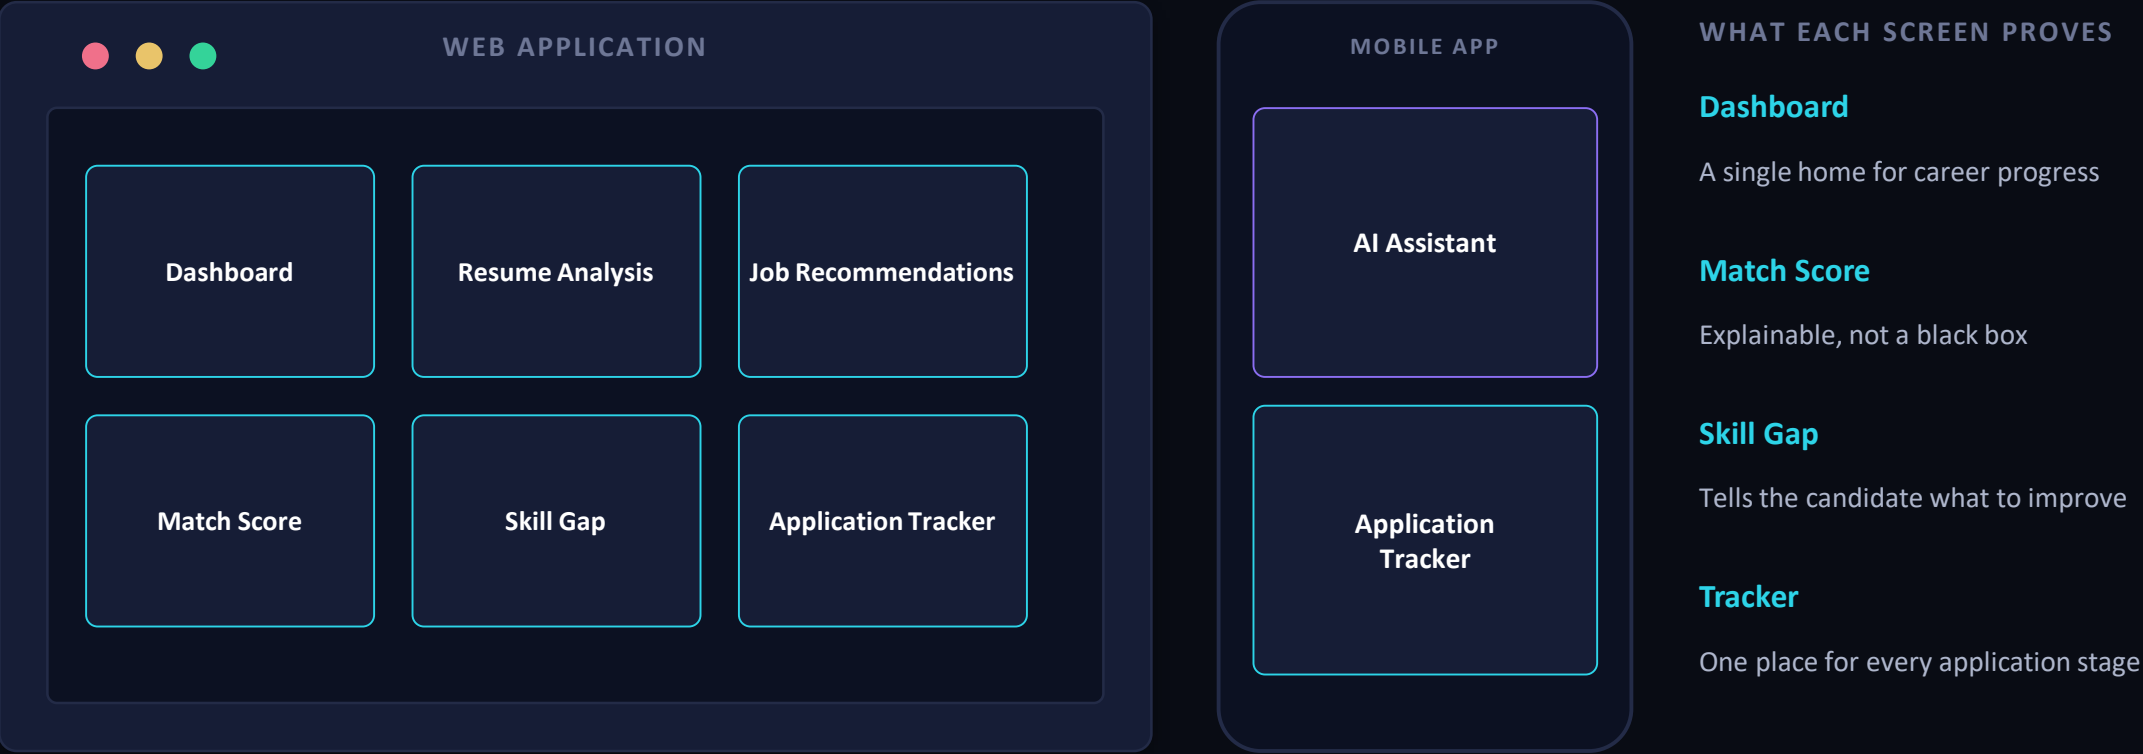

# The Entire Product, In 10 Seconds

# AI Is Not a Feature. AI Is the Engine.

# Web + Mobile = One Career Intelligence Experience

Wireframe representation of the working web and mobile applications.

# One Resume. One Intelligent Career Journey.

## WHAT THE JURY SHOULD WATCH FOR

A structured candidate profile

Explainable match scores

At least 3 ranked jobs

A working application tracker

# What Makes CareerPilot Innovative?

1

## Semantic Career Matching

AI understands the meaning of skills, experience and job requirements — not simple keyword filtering.

2

## Explainable Matching

Instead of only a % score, the system explains WHY a role fits.

3

## Skill Gap Intelligence

Identifies what the candidate is missing and what to improve next.

4

## Personalized Career Guidance

The same search becomes personalized to each candidate.

5

## End-to-End Career Journey

Resume → Discovery → Matching → Guidance → Application Tracking.

***“We are not building another job board.  
We are building a career intelligence layer on  
top of the job search.”***

# CareerPilot AI vs. a Traditional Job Portal

|                        | TRADITIONAL PORTAL | CAREERPILOT AI |
|------------------------|--------------------|----------------|
| Keyword Filtering      | ✓                  | ✓              |
| Semantic Understanding | ✗                  | ✓              |
| Match Explanation      | ✗                  | ✓              |
| Skill Gap Analysis     | ✗                  | ✓              |
| Personalized Guidance  | ✗                  | ✓              |
| Application Tracking   | ✗                  | ✓              |
| AI Career Assistance   | ✗                  | ✓              |

CareerPilot is positioned as an intelligence layer on top of the job search — not another listing platform.

# Layered, Credible, Understandable in 15 Seconds

LAYER 1 — CLIENTS

LAYER 2 — BACKEND

LAYER 3 — AI

LAYER 4 — DATA

Diagram uses generic layer names — swap in the exact stack (frameworks, AI provider, database) used by the actual build before presenting.

# One Platform. Multiple Scalable Revenue Channels.

PLANNED REVENUE STREAMS

# Built for One Candidate. Designed to Scale.

## TARGET USERS

### Primary

- Students
- Fresh Graduates
- Job Seekers

### Secondary

- Career Switchers
- Training Institutes
- Universities
- Placement Cells

*The same AI infrastructure serves an increasing number of users as CareerPilot expands from individuals to institutions.*

## SCALABILITY PATH

## VISION

# Our Vision

*To become an AI-powered career intelligence platform that helps every individual understand where they stand, discover where they fit, and know what to do next.*

AI Resume Intelligence

1

Skill Gap + Career Roadmaps

2

Semantic Job Matching

3

4

Interview Intelligence

Personalized Career Copilot

5

Institutional Career Intelligence

6

### FUTURE POSSIBILITIES (roadmap — not yet implemented)

Interview simulation • Continuous skill tracking • Personalized learning recommendations • Career trajectory prediction • Multilingual assistance • Institution-level placement intelligence

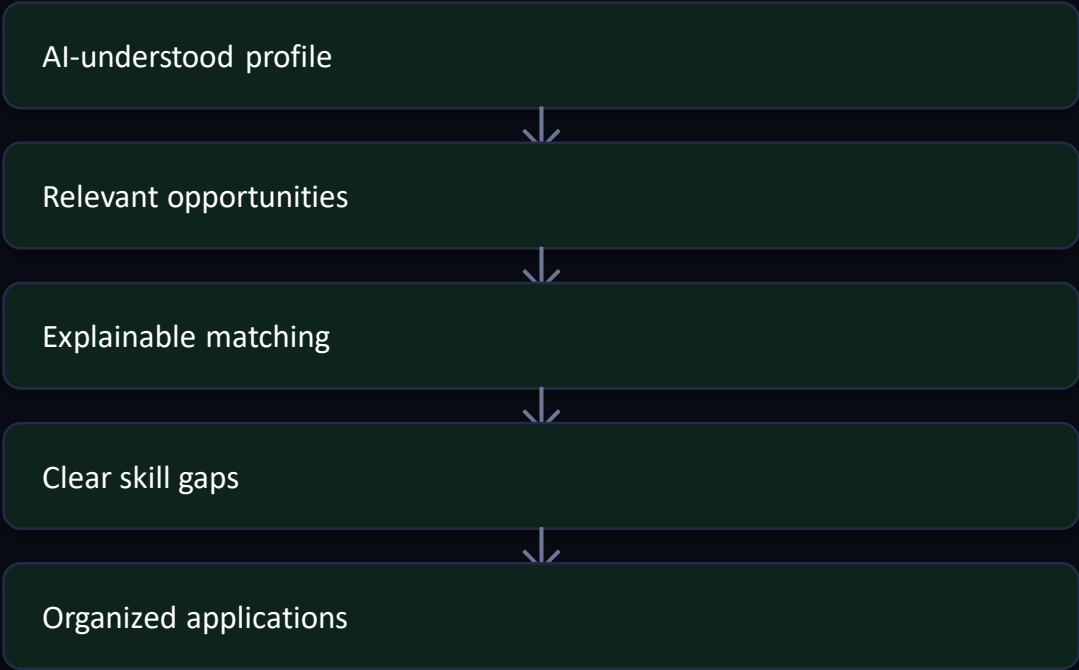

IMPACT

# From Job Search to Career Intelligence

BEFORE

AFTER

TIME

Reduce search effort

CLARITY

Understand why a role fits

SKILLS

Know what to improve

CONFIDENCE

Make informed decisions

ACCESS

Career guidance made more accessible

# THE FUTURE OF JOB SEARCH ISN'T MORE JOBS. IT'S BETTER MATCHES.
